

f-1

Semi-professional football table offering the biggest fun for budding players. Manufactured with quality materials and the greatest care for details, F-1 is able to offer innovative solutions such as the telescopic safety bars and the leg levellers. The very good quality/price ratio makes this product stand out among the others.

- 1** 15mm (5/8") thick MDF cabinet with melamine coating, in cherrywood effect.
- 2** Strong square MDF legs (7,5 x 7,5cm / 3" x 3") with black melamine coating, for the maximum stability during the playing. Standard levellers for a perfectly flat playing field on uneven floors.
- 3** MDF playing field with melamine coating, green with white lines. The particular "grass" effect gives the impression of being in a football ground.
- 4** 13mm diameter tube bars (1mm thickness). Possibility of choosing between solid bars and telescopic safety bars (do not protrude).
- 5** Solid bar ends are covered by plastic protection for increased safety.
- 6** Multicolour players singularly fixed onto the bars.
- 7** Easier scoring thanks to the fully rotating goalkeeper and the particular players scheme: 1 (goalkeeper), 3 (full backs), 4 (midfielders), 3 (forwards).
- 8** Score counters marking up to 10 goals.
- 9** Quick and easy ball recovery through an exit behind each goal.

TECHNICAL CHART
