GB

Fully tailored on professional players's requirements, this is the latest release of the competition model already become a classic.

1 3cm (1+1/4in) thick cabinet walls made from layers of plywood and medium density fibreboard combined together to provide the sturdiest and at the same time most flexible construction possible. Colour: black with ITSF logo and official Competition plate with authorization certificate with series number.

2 MDF playfield support board, for an increased cabinet stress resistance, reinforced by metal bars for the maximum compactness and stability during the competitions.

3 Two adjustable supports inside the cabinet allow to obtain a perfectly levelled playfield.

4 The cabinet can be opened to reach the inside. When the upper cabinet is lifted, a metal support bracket automatically activates to avoid the falling of the same.

5 Playing field of tempered non-reflective sanded glass. Green background with white lines to look like a football ground.

6 New playfield corners without steps for a correct ball running.

7 Goals in HDP (high density polymer) reinforced with fibreglass and innovating profile moulded to prevent irregular ball trajectories.

8 Balancing inside goal to absorb the ball bumps and preventing bouncing off.

9 16mm diameter high stress resistance steel going-through bars coated with anti-rust chromium-plating and increased thickness (3mm) allowing 50 % more torsion resistance than traditional bars. They do not bend after prolonged use.

10 New rubber bumpers instead of springs (21 mm length) for a better shock absorption.

11 Distancing rubber on the goalkeeper bar maintaining the player within the goal range of action.

12 Steel roller bearings to greatly improve the game speed, while reducing the stress for the players' wrists.

13 Red and blue rounded foot players in unbreakable plastic moulded onto the bars with fully rotating (360 degrees) goalkeeper.

14 Professional plastic handles with wooden inserts to reduce perspiration and improve grip.

15 Competition abacus score counters enabling to mark game sets and goals.

16 On request ashtrays and can-holders.

17 9 x 9cm (4' x 4') square steel legs coated with antiscratch silver powder-varnish

18 Competition levellers for a perfectly flat playing field.

19 Mechanical coin mechanism included. On request electromechanical or electronic coin mechanism.

F

Taillé sur mesure pour les exigences des joueurs professionnels, c'est la dernière version du modèle de compétition qui est désormais un classique du panorama mondial des tournois.

1 Meuble en couches de bois contre-plaqué et MDF alternées et jointes ensemble pour obtenir une structure extrêmement robuste (épaisseur 30mm) et au même temps flexible. Couleur: noir avec logo ITSF et plaquette officielle avec certificat d'enregistrement *Compétition* avec numéro de série.

2 Plan soutenant le champ de jeu en MDF pour une plus grande résistance aux sollicitations, renforcé par des barres de métal pour une consistance et stabilité très élevées pendant les matchs.

3 A l'intérieur du meuble des supports réglables en hauteur permettent d'obtenir une surface de jeu parfaitement nivelée.

4 Meuble ouvrant pour accéder à son intérieur aisément, grâce à un soutien en métal supportant en pleine sûreté la partie supérieur du babyfoot lorsque elle reste soulevée.

5 Surface de jeu en verre trempé sablé. Couleur: vert à lignes blanches reproduisant un vrai terrain.

6 Nouveaux coins champ de jeu sans dénivellation pour un correct écoulement de la balle.

7 Contour des buts en HDP (polymère à haute densité) renforcé de fibre de verre avec un innovatif profil pour empêcher les trajectoires irrégulières des balles.

8 Intérieur de but en laminé plastique coulissant pour amortir les chocs des balles en empêchant qu'elles puissent ressortir.

9 Barres sortantes diamètre 16mm en acier haute résistance chromé anticorrosion. L'épaisseur de 3mm augmente de 50 % la résistance à la torsion en comparaison des barres traditionnelles: elles ne se plient pas, gardant toujours une forme parfaite après un usage prolongé.

10 Caoutchoucs (longueur 21mm) au lieu des ressorts, en matériau plastique nouveau mélange pour une meilleure absorption des coups.

11 Barre du gardien avec caoutchouc distanceur retenant le joueur dans le rayon du but.

12 Coussinets en nylon fournis de roulements à billes, garantissant la rapidité du jeux sans fatiguer les joueurs.

13 Joueurs en matériau plastique indestructible moulés sur les barres, Couleurs: bleu/rouge. Gardien de but tournant sur lui-même (360°).

14 Poignées en bois-plastique, pour une prise plus agréable.

15 Compteurs type compétition pour marquer les manches du match et les buts.

16 Sur la demande cendriers et porte-boissons.

17 Pieds carrés (9 x 9 cm) en métal traité à la peinture anti-égratignure couleur argent.

18 Pieds niveleurs type compétition pour un terrain de jeu parfaitement plan.

19 Monnayeur mécanique de série. Sur la demande monnayeur électromécanique ou électronique.

**Elevato controllo di palla o grande velocità di gioco ?  
Ora si può scegliere.**

Su World Champion si può giocare con due tipi di palle, entrambe di alta qualità, realizzate con caratteristiche differenti l'una dall'altra per garantire le migliori prestazioni possibili a seconda del tipo di gioco preferito\*.

**Pallina "High Control"**

Pallina in tecnopolimero, che si caratterizza per la superficie leggermente ruvida, appositamente realizzata per permettere un eccellente controllo di palla. Soddisfa completamente le esigenze dei giocatori più sofisticati di effettuare tiri complessi e di grande perfezione. Colore arancio.

Diametro: 34,5mm Peso: 26gr ca

**Pallina "Speed Play"**

Pallina in poliolefine, dalla superficie perfettamente liscia, progettata con caratteristiche che la rendono adatta a offrire una notevole velocità di gioco. Adatta a tutti coloro che amano lo stile "al volo" in tutte le sue varianti. Colore giallo.

Diametro: 33,7mm Peso: 22gr ca

**Caratteristiche comuni:**

Le palle "High Control" e "Speed Play" sono stampate ad altissima pressione in modo da garantire una assoluta omogeneità del materiale impiegato, che resta totalmente privo di bolle d'aria.

La cura nella progettazione e costruzione dello stampo è garanzia di perfetta sfericità, condizione prima per ottenere traiettorie fedeli in ogni azione di gioco.

La robustezza delle mescole impiegate, derivate dalla fusione di materiali plastici le cui percentuali sono state a lungo studiate per poter arrivare alla composizione più adatta alle necessità specifiche, fa sì che queste palle non si scheggino, non si sfaldino, non si deformino anche dopo innumerevoli partite, mantenendo prestazioni elevate nel tempo.

\*le palle sono fornite a parte, su richiesta.

**High ball control or great playing speed ?  
Now you have the choice.**

When you play on a World Champion football table you can choose between two types of balls: both are high quality, but made with different features to allow the best possible performances according to the style of game you prefer\*.

**Ball "High Control"**

Ball in tecnopolymer, featuring a slightly rough surface, to enhance the ball control. It will completely satisfy the requirements of the keenest players to effect highly complex shots. Colour: orange.

Diameter: 34,5mm Weight: 26gr ca

**Ball "Speed Play"**

Ball in polyolefin, having a perfectly smooth surface to offer a remarkable speed of the game. Suitable for those who love the "al volo" style in all its versions. Colour: yellow.

Diameter: 33,7mm Weight: 22gr ca

**Shared features:**

The balls "High Control" and "Speed Play" are injection moulded with a very high pressure, as to obtain an absolute homogeneity and consistency in the materials used, which remain totally devoid of air bubbles.

The care in the mould designing and constructing results in perfectly spheric balls, capable to run with faithful trajectories in all game phases.

The moulded compounds have been obtained from the fusion of various material in different percentages selected with great care.

Both types boast a very sturdy composition, preventing any chipping, flaking or deformation even after numberless games, to maintain high performances in a long time.

\*balls are supplied separately, on request.
